PRIDAY, JULY 26, 1878,

clation," the latest phase of the insurance business, the object of which purports to be the guarantee of honesty and integrity of people occupying positions and private trust. Places of public and private trust. Places of public and private trust include, we sand dollars that a man is paid in silver a wheelbarrow would become necessary the Democratic treasury of an Ohio township. Just look back over the past semi-ship. Just look back over the past semi-smile. suppose, everything in that line down to the Democratic treasury of an Ohio town-ship. Just look back over the past semi-decade and imagine if you can such a company doing a fair run of business, and then if you can contemplate with equinimity of soul the fearful risks, the frightful losses that the association would have incurred, you are a philosometry berr, in comparison with whom the ancient stoice need not be mentioned. Think of the fifteen or teasty counties in Ohio that have Democratic treasurers short in their account; think of State Treasurer Gates, the Democratic dicial who manipulated the State of Missouri out of, five hundred thousand dollars; that a description of coined silver weighing out of, five hundred thousand dollars; think of the bestting weak-news and instead of the state of Missouri out of, five hundred thousand dollars; think of the bestting weak-news and imited internal exchange, and provided the possibly and provided the possibly and provided the State of Missouri out of, five hundred thousand dollars; that a man is paid the excellence where the provides the proposed to remove it.

"It a hundred was nearly broke, being whethers, hund it the proposed to remove it.

"It a hundred was nearly broke, being whethers, hundred with the fell asleep; and the fift with but \$20 or so, which he staked—in the company that the proposed to remove it.

"It a hundred was nearly broke, being whethers, hundred with the pay at once \$300,000 time the staked—in the part of the three proposed to remove it.

"It a hundred was nearly broke, being with the pay at once \$300,000 time delicarded, on the firightful losses that the seal collect and the hald be and the hald be and the hald be and there is not probably a bank vant in the firightful losses that the event of the standard of the world probably have continued the beat and the hald be and there is not probably a bank vant in the world probably have continued the beat and there is not probably and antant and the hald be and there is not probably and and the

ing the past week has been decidedly the past week has been decidedly dull. Merchants and manufacturers have also been inactive, their trade being confined to small orders from regular customers, as is usual in the middle of July.

Of course, outside buyers give the city a wilde berth during the heated term. The whole people, as far as circumstances will permit, give themselves up to rest and an effort to keep cool. The first three days of the past week were decidedly scorchers, and bank presidents, cashiers, and customers alike did the least amount of business possible. In discounts and all other lines there was no change in rates, so that no mental effort was required to keep up with the currents of trade. The fact is, there was no current, and their main business was to look quietly upon the stagnation in about all the departments of trade.

PRE-EMPTION OF RAILROAD LANDS.—

PRE-EMPTION OF RAILROAD LANDS.—
A question of considerable importance to settlers in the West has just been decided by the law officers of the Interior Department. The charters of the Pacific and other railroad companies which obtained land grants from the Government dontain clauses providing that such of the Jands as remain unsold three years after the completion of the roads shall be subject to entry and pre-emption under the the completion of the roads shall be sub-ject to entry and pre emption under the homestead laws, at \$1.20 per acre. The question submmitted to the law officers appears to have been whether or not this clause means what it says, and the de-cision is said to be "favorable to the set-tlers," but the text of it has not yet been published. The decision is likely togive rise to much litigation, since settlers have been buying in the lands since the expiration of the three years terms fol-lowing the completion of the roads at prices ranging from \$2.50 to \$15 per acre. But whatever questions may arise as to But whatever questions may arise as to the titles to land heretofore sold, and as the titles to land heretofore sold, and as to the right of the settlers to recover the amount paid in excess of \$1.25 per acre, the decision will open up very valuable lands now held by the companies. Subsidies were granted to the railroad companies for the express purpose of "developing" the country along their routes, and the clause in question was inserted in their charters to insure the accomplishment of this purpose. The opening up of railroad grants to pre-emption at the price charged for Government lands will do something towards correcting threatened evils arising from these "landed monopolies," and may, in the end, prove beneficial to the companies themselves by increasing the traffic over their roads.

The marriage of Queen Victoria's third son Arthur William Patrick Albert, Duke of Connaught, to Princess Marie Louise of Prussia, will leave only two of the Queen's children unmarried, namely, Leopold and Beatrice. Prince Arthur is twenty eight years old. The Princess Marie Louise of Prussia is the daughter of Prince Frederick Charles, who is a nephew of the Emperor William and is the great Prussian General to third son Arthur William Patrick Albert, Duke of Connaught, to Princess Marie Louise of Prussin, will leave only two of the Queen's children unmarried, namely, Leopold and Beatrice. Prince Arthur is twenty eight years old. The Princess Marie Louise of Prussin is the daughter of Prince Frederick Charles, who is a nephew of the Emperor William and is the great Prussian General to whom Bazine surrendered Metz. The Princess Marie Louise is his oldest child, and was born on the 14th of September; 1855. It is not probable that any sertons opposition will be made in the England House of Commons to the grant of money which it is customary to make when a child of the sovereign is married, but Sir Charles Dilke will doubtless succeed in setting forth some statistics of the cost of royalty which will be the occasion of considerable discussion and some scandal.

W & CAMPBELL

the bonanza mines, wouldn't foot up the capital stock required by such an inaurance combination. The bare contemplation of the figures is too heavy for the heated term; we leave it.

The Chicago Tribune of Monday describes the financial situation in that city as follows: "Business at the banks during the first the same time see that it is as follows: but he could be a such that city as follows: but he could be a such that city as follows: but he could be a such that city as follows: but he could be a such that the dollar of the Spartan daddy or of the could be a such that the dollar of the Spartan daddy or of the could be a such that the dollar of the spartan daddy or of the could be a such that the dollar of the Spartan daddy or of the could be a such that the dollar of the Spartan daddy or of the spartan that the dollar of the Spartan daddy or of the spartan that the dollar of the spartan that the dollar of the spartan that t the fathers that we want, but the dollar of the Yankee sons that the country re-

thus far of but a few months with the great silver experiment; and yet the time has been aufficiently long to verify these predictions of Mr. Well's, and to demonstrate as he expresses it, that the attempt to restore the old silver dollar to its place as lawful money, without quali-fication or limitation, is as fooligh and

its place as lawfol money, without qualification or limitation, is as foolish and abund as an attempt to replace through legislation railroads by stage coaches and atsamahips by sailing ressels."

The mischief of the silver movement, however, is that while the people cannot conveniently use the coin in the transaction of their business, while, as is proved already, they will not use it, they are compelled to accept it as a false measure of value. If ninety cents worth of metal is declared by daw to be a dollar, it will become a depreciated standard just as soon as it is made or coined in sufficient quantities to life it from a merely subsidiary rank. It will do this under the law by which cheap money crowds out dear money. The one-hundred-cents gold dollar would have no chance against the ninety-cent silver dollar. This would happen if the silver all remained in the Treasury vaults and was represented either by certificates or by notes redeemable with it. It is not necessary for the silver actually to circulate in order to the control of th

Suresi Tranquilizer of the Nerves
The surest tranquilizer of the nerves is a medicine which remedies their superasitiveness by invigorating them. Orertension of the nerves always weakens them. What they need, then, is a tonic, not a sedative. The latter is only useful when there is infense mental excitement and an immediate necessity exists for producing quietude of the brain. Hostetter's Stomach Bitters restores tranquility of the nerves by endowing them with the vigor requisite to bear, without being jarred or disturbed, anhealthfully, the ordinary impressions produced through the media of sight, hearing and reflection. Nay, it does more than this,—it enables them to sustain a degree of tension from mental application which they would be totally unable to endure without its assistance. Such at least is the irresistible conclusion to drawn from the testimony of business and professional men, litterateurs, clergymen, and others who have tested the fortilying Surest Tranquilizer of the Nerves professional men, litterateurs, clergymen, and others who have tested the fortilying and reparative influence of this celebrated tonic and nervine.
